Product Portfolio - Case Studies & Prototypes

Summary

Technical Product Manager | Senior Product Owner with 10+ years of experience delivering digital products across e-commerce, B2B/B2C platforms, and operational systems. Strong background in API-driven product delivery, backlog ownership, technical analysis, UI/UX definition, and cross-functional execution with engineering teams. Combines product ownership, business process expertise, and hands-on problem solving to turn complex operational and integration requirements into scalable product solutions across retail and travel domains.

Experience

Senior Technical Product Manager - Biletbank (Technoly Istanbul)

10/2023 - 04/2026 | Istanbul, TR

- Managed end-to-end API integration processes with AJET NDC (20.1/SOAP to 24.1/REST migration), AVIA Center, and AERTicket-related provider flows, covering technical documentation, XML/JSON schema mapping, provider alignment, and go-live delivery.
- Owned the product backlog and roadmap for the B2B Travel Agency Portal and related digital product flows; translated business and provider requirements into prioritized epics and stories with clear AC/DoD and partnered with engineering across sprint delivery.
- Defined and delivered ancillary service flows end to end, covering service architecture, provider-specific logic, product behavior, and UI/UX requirements for post-booking add-ons.
- Managed and evolved the Faring pricing module covering dynamic and standard markups and fare consolidation; took over governance from a third-party vendor, maintained operational continuity, and defined product requirements for iterative improvements.
- Investigated complex pricing, booking, and payment flow issues using SQL Server (T-SQL), Postman, and SOAP tooling by tracing provider responses and internal service logs to identify root causes and support stable release decisions.
- Designed and delivered customer onboarding and new registration flows for the B2B travel agency portal, mapping end-to-end user journeys, authoring acceptance criteria, and coordinating engineering delivery.
- Owned product UX definition for complex booking, ancillary, onboarding, and operational flows by creating wireframes, defining user journeys, and translating requirements into delivery-ready stories.
- Worked directly with airline, aggregator, and provider teams to validate technical issues, align requirements, manage escalations, and support integration rollouts and operational readiness.

Product Owner / Scrum Master (Contract via SahaBT) - Coca-Cola Icecek (CCI)

09/2022 - 04/2023 | Contract

- Supported the Salesforce Contract Lifecycle Management (CLM) rollout for Finance and Sales Operations across 11 countries, translating business unit needs into a prioritized roadmap and delivery scope.
- Ran Scrum: owned Jira backlog, refined epics/stories with clear AC/DoD, and facilitated planning/review/retro.
- Coordinated UAT: designed test scenarios, managed execution and defect triage, and prepared release notes/runbooks.

Product Owner / Scrum Master - Farmazon

12/2021 - 05/2022

- Owned the roadmap and backlog for B2B e-commerce and Order Management (OMS); set clear AC/DoD and sprint goals; facilitated planning/review/retro.
- Delivered marketplace and API integrations end to end (OpenAPI/Swagger, Postman); defined API contracts, aligned third-party integration requirements, and supported UAT across staging and branch environments.
- Collaborated with Product Design in Figma, authored Gherkin user stories, and ran UAT on staging/branch builds; maintained release notes/runbooks.

DeFacto Perakende Tic. A.S. | Istanbul, TR

Senior Product Owner (E-commerce) | Jan 2021 - Dec 2021

- Owned the core product scope for defacto.com.tr; translated business needs into a prioritized roadmap and coordinated cross-functional execution with engineering, Category Management, and business teams.
- Managed back-office and operational tooling improvements supporting 25 e-commerce sites; handled discovery, story writing, UAT, and release readiness.
- Worked on product flows related to storefront operations, operational tooling, and cross-team delivery within a large-scale retail e-commerce environment.

Senior Merchandiser (Commercial Ops) - Cross-Functional Experience | Jan 2019 - Jan 2021

- Delivered the Local and Direct Sourcing program across multiple countries by mapping as-is/to-be workflows, defining requirements, and partnering with IT and Business Development on tooling and dashboards.
- Managed vendor onboarding and category spend; set SLAs/KPIs, coordinated Legal and Finance, and supported pilots and change-management activities to stabilize the new flow.

Product Owner (Returns and Refunds Program) | Dec 2015 - Jan 2019

- Owned the company-wide returns and refunds program (budget + systems); delivered process and system analysis and improvement initiatives that reduced annual costs from $8M to $3M (-62.5%) in two years.
- Managed backlog and roadmap activities by translating cross-functional requirements (Stores, E-commerce, Finance, and Customer Service) into prioritized stories and coordinating delivery with IT.
- Established KPIs, controls, approval workflows, reporting structures, and operational documentation to improve visibility and governance.

Business Analyst - Universal Information Technologies

12/2014 - 12/2015

- Conducted requirements and process analysis via stakeholder interviews/workshops; documented as-is models, KPIs, and pain points.
- Performed gap and impact analysis; designed to-be processes (BPMN/SOPs), defined acceptance criteria and controls, and authored process documentation.
- Supported implementation with test design and UAT analysis; monitored post-go-live performance and iterated improvements.

Area Sales Manager / Management Trainee - Hedef Alliance Holding A.S.

10/2010 - 01/2014

- Managed regional sales operations and key accounts; negotiated contracts and tracked KPIs/sales campaigns.
- Built stock/sales reporting and the annual Census Report for 75 branches; improved cold-chain logistics processes.
- Supported central IT and Operations during the Istanbul mega-warehouse project; applied industrial engineering methods to optimize process efficiency.

Note: Military Service (compulsory) - 2011 - 2012 – Turkiye

Education

Istanbul Kultur University - B.Sc., Industrial Engineering (ENG) - 2005 - 2010 - Istanbul, Turkiye

Certifications

PSM I (Scrum.org); PSPO I (Scrum.org); IBM AI Product Management Certificate - In Progress

Languages

Turkish: Native; English: B2 Upper

Skills and Tools

Product & Delivery: Agile/Scrum delivery, backlog ownership, roadmap execution, user stories, AC/DoD, UAT, stakeholder management

Domain: E-commerce, B2B/B2C platforms, travel distribution, airline distribution (IATA NDC), back-office systems, pricing and ancillary flows

Technical Product Work: API integrations, REST, SOAP, IATA NDC 20.1/24.1, OpenAPI/Swagger, API testing, integration testing, XML/JSON schema mapping, technical analysis

Tools: Jira, Confluence, Postman, SoapUI, Microsoft SQL Server (T-SQL), VS Code, Figma

Design & Process: UI/UX flows, wireframes, mockups, prototypes, BPMN, runbooks, release notes

Web & Markup: HTML, XML, JSON
